

# The IMPACT Engine™ PMO Path

## Laura Barnard, PMP, CCMP IMPACT PMO Creator

With the harsh reality that nearly 50% of PMOs fail, it's easy to see why so many business leaders struggle to understand the value of PMOs – and why they are so quick to pull the plug on them.

What if you had a way to build a PMO that was as important to you as the IT department or as critical to organization success as your Marketing or Business Development department?

That's exactly what I'm offering with this program.

## A system based on experience.

### The IMPACT Engine™ PMO System works. Period.

This step-by-step course will help your organization build a strong and sustainable PMO from the start or take your PMO to the next level of IMPACT. Your PMO leader will get the exact same system I use with my clients to create a PMO that smart business leaders are using to ensure the PMO evolves and thrives even when the “priorities shift” in your organization.

I'm so confident that this program works (because I've been using the techniques for 20 years) that I offer a money back guarantee.

**You can learn more about this program at [IEPMO.com](http://IEPMO.com).**

# IMPACT ENGINE 90 DAY PMO

*Your solution to driving higher return on investment for your organization's initiatives.*

Instead of the typical people, process, tools, throw a bunch of templates at projects PMO approach, the IMPACT Engine PMO shifts the focus of the PMO to enable ever-higher project IMPACT, drive greater throughput and maximize ROI.

The best part? We get to these outcomes quickly and sustainably.

The key is using a system crafted by executives to create a self-sufficient organization capable of delivering on the organization's strategic objectives without the process-heavy focus that plagues so many PMOs. The IMPACT Engine PMO works across any implementation methodology and every industry, working seamlessly with an Agile environment because the PMO is built using an Agile mindset to deliver IMPACT quickly.

*Laura helped us build project management capacity and deliver important change at a critical time in the evolution of our organization. The results exceeded our expectations and enabled us to accelerate progress towards our goals. Best of all, we are now more self-sufficient with respect to all aspects of portfolio and project management.*

**Joel Albizo, FASAE, CAE**  
CEO

*Long overdue, Laura has come up with a formula to make this IMPACT Engine the defining attribute of the best PMOs. I have applied her techniques for massive non-profit projects, government, and commercial organizations. I encourage you to leverage the IMPACT Engine PMO program to build a PMO that gets it done.*

**Mike Hannan, PMP, TOC Jonah**  
CEO

## *You have three options:*

**You can go it alone.** You can have your PMO leader gather all the books and research on what others have done, pouring through the different approaches, techniques, and what will feel like mountains of conflicting information. Time will go by and you will wonder when the PMO will finally make an IMPACT.

**You can hire an expensive consultant to build the PMO for you.** In fact, the system I'm sharing with you is the exact framework I apply with my clients and we get amazing results for 5 and 6 figure price tags. However, I've seen many other consultants claim experience they don't have, do the bait and switch from sales to onsite team, leave you with a solution that isn't sustainable, or try to sell you on ongoing consulting fees that can get ridiculous!

**You can make a small investment** in a partner like me that will help you along the way, leveraging the same system and techniques applied in REAL WORLD PMOs across industries and in small firms to global organizations over the last 20 years. Essentially, you're getting access to all the knowledge that makes me a six-figure consultant - for a fraction of the cost!
